

### Section 3: North America

☞ How did the peoples of the Arctic and Subarctic adapt to their environment?

1. H \_\_\_\_\_ rather than f \_\_\_\_\_ .
2. M \_\_\_\_\_ people rather than s \_\_\_\_\_ .

☞ What were some of the common cultural traits of the peoples of the Eastern Woodlands?

1. An e \_\_\_\_\_ based on both h \_\_\_\_\_ and g \_\_\_\_\_ and p \_\_\_\_\_ c \_\_\_\_\_
2. M \_\_\_\_\_ b \_\_\_\_\_
3. Territorial land based on h \_\_\_\_\_ grounds
4. T \_\_\_\_\_

☞ How did the peoples of the Great Plains adapt to their environment?

1. First of all, what is the most misleading image of the American Indian?
2. Secondly, it should be no surprise that like the other North American Indians, they relied on both \_\_\_\_\_ and \_\_\_\_\_ .

☞ How did life in the West, the Southwest, and the Pacific Coast differ?

1. The biggest problem for the Desert West was the lack of \_\_\_\_\_ .
2. The book misleads somewhat because they try to categorize too many Indian groups into too few categories. For instance, the Indians of the Great Basin lacked w \_\_\_\_\_ , but those in the Plateau of the “desert west” relied on s \_\_\_\_\_ f \_\_\_\_\_ .
3. The Southwest Indians are known for their above-ground adobe villages, known as \_\_\_\_\_ and their crafted c \_\_\_\_\_ . Neither of these facts should surprise you since *everyone* knows people adapt to the \_\_\_\_\_ or force the environment to \_\_\_\_\_ to them.
4. The Pacific Coast Indians enjoyed extraordinary g \_\_\_\_\_ d \_\_\_\_\_ -- unlike other regions of the continent. This led to a certain degree of s \_\_\_\_\_ not found in other areas. Though found in other areas, t \_\_\_\_\_ reached the greatest level along the Pacific Coast because of local abundance.

Take your complete page 3 to Mr. Schlosser to be graded. Correct any errors. “Bin”. Pick up reading 8.3 “Women Leaders in North American Indian Societies”; complete with *thorough* answers. “Bin”. Pick up page 4.
